

GENRE TAGS USED IN THE INDIE VENUE BIBLE

Yes, there are **hundreds** of genres of music. However, in order to make sure that each tag stands out, we had to **limit** the number of tags we used. The tags you see in the list below cover every known **style** of music from Ambient to Zydeco. You're in there somewhere.

Each genre tag is also used to identify **festivals** or **jams** featuring that style of music.

For example, the **BLUES** tag would also be used for **BLUES JAM** and **BLUES FESTIVAL**

Some genres are so closely related that we use the same color of tag.

For example **R & B** **SOUL** have the same color tags because although they are different genres, it's almost certain that any venue that features **Soul** artists will also welcome **R&B** artists.

Festivals have tags for each style of music that they feature. If there are too many styles to list, we use the tag **VARIOUS STYLES FESTIVAL**

It's the same with **booking agents**. If there are too many genres to mention, the tag we use is **BOOKING VARIOUS STYLES**
